Reducing Harms,
Improving Lives

Project Description: Charity Website Exploration (OSI-CAN Saskatchewan)

By Erin Hidlebaugh, *Program Coordinator, AIDS Programs South Saskatchewan*

Overview

Building Hope, Changing Lives Every Day.

AIDS Programs South Saskatchewan (APSS) is a community-based, registered charitable organization dedicated to improving the quality of life for people living with or affected by HIV/AIDS and hepatitis C (HCV), as well as people at risk of infection or overdose. Through education, prevention, outreach, compassionate support, counselling, programs, and advocacy, APSS provides current information and practical resources that help people make informed decisions, reduce HIV transmission and substance-use-related harms, and build healthier, more inclusive communities.

APSS has also partnered with the University of Regina on two research projects connected to reportneedles.ca, its website for mapping reported hot spots. This one-of-a-kind reporting tool uses geographic mapping to identify patterns in community reports. These projects have produced research materials that APSS needs to make accessible through a dedicated website.

The Challenge

APSS's main website serves people who use its programs and services and is generally user-friendly, so redesigning it is not the priority. Instead, students will design a complementary, user-friendly website that presents APSS's research clearly and professionally. The site should allow visitors to browse current and completed projects, access published journal publications and articles, view research posters, follow research updates through a blog, and move easily between the research website, the main APSS website, and reportneedles.ca.

- **Design approach:** Iterative check-ins matching the class schedule, low-fidelity concepts Oct 7, high-fidelity Oct 21, WordPress work-in-progress Nov 4, final delivery Dec 2.
- **Technology/Programming environment:** WordPress (ECN's current site platform).
- **Initial design notes:**
    - See "The Challenge." We are looking forward to working with you on ideas to help us highlight our projects and beyond!
