CUSTOMER CHECK-IN 1

Today’s agenda

01 What we heard

02 Empathy map and problem insights

03 Site map ideas

04 Low-fidelity prototypes

05 User story map

06 Questions and next steps

Each topic ends with your feedback: what’s good, what’s bad and what we can improve.

WHAT WE HEARD

A dedicated home for APSS research

The main APSS website already serves people who use its programs and services. Research from two U of R projects connected to reportneedles.ca needs its own complementary website.

Show the research

Current and completed projects, journal articles and research posters

Share updates

A research blog that visitors can follow over time

Connect the sites

Easy movement between the research site, the main APSS site and reportneedles.ca

Platform: WordPress · **Final delivery:** December 2

EMPATHY MAP · DRAFT TO CONFIRM

Who is looking for APSS research?

Says

- “Where is APSS research?”
- “Is this project current?”

Thinks

- Can I trust and cite this?
- How do the sites connect?

Does

- Searches for articles and posters
- Moves between APSS sites

Feels

- Lost when research is scattered
- Confident when it looks professional

ASSUMED VISITOR

A researcher, partner or community member looking for APSS research

Who visits most: researchers, funders, community members or media?

PROBLEM INSIGHTS · FROM OUR AFFINITY DIAGRAM

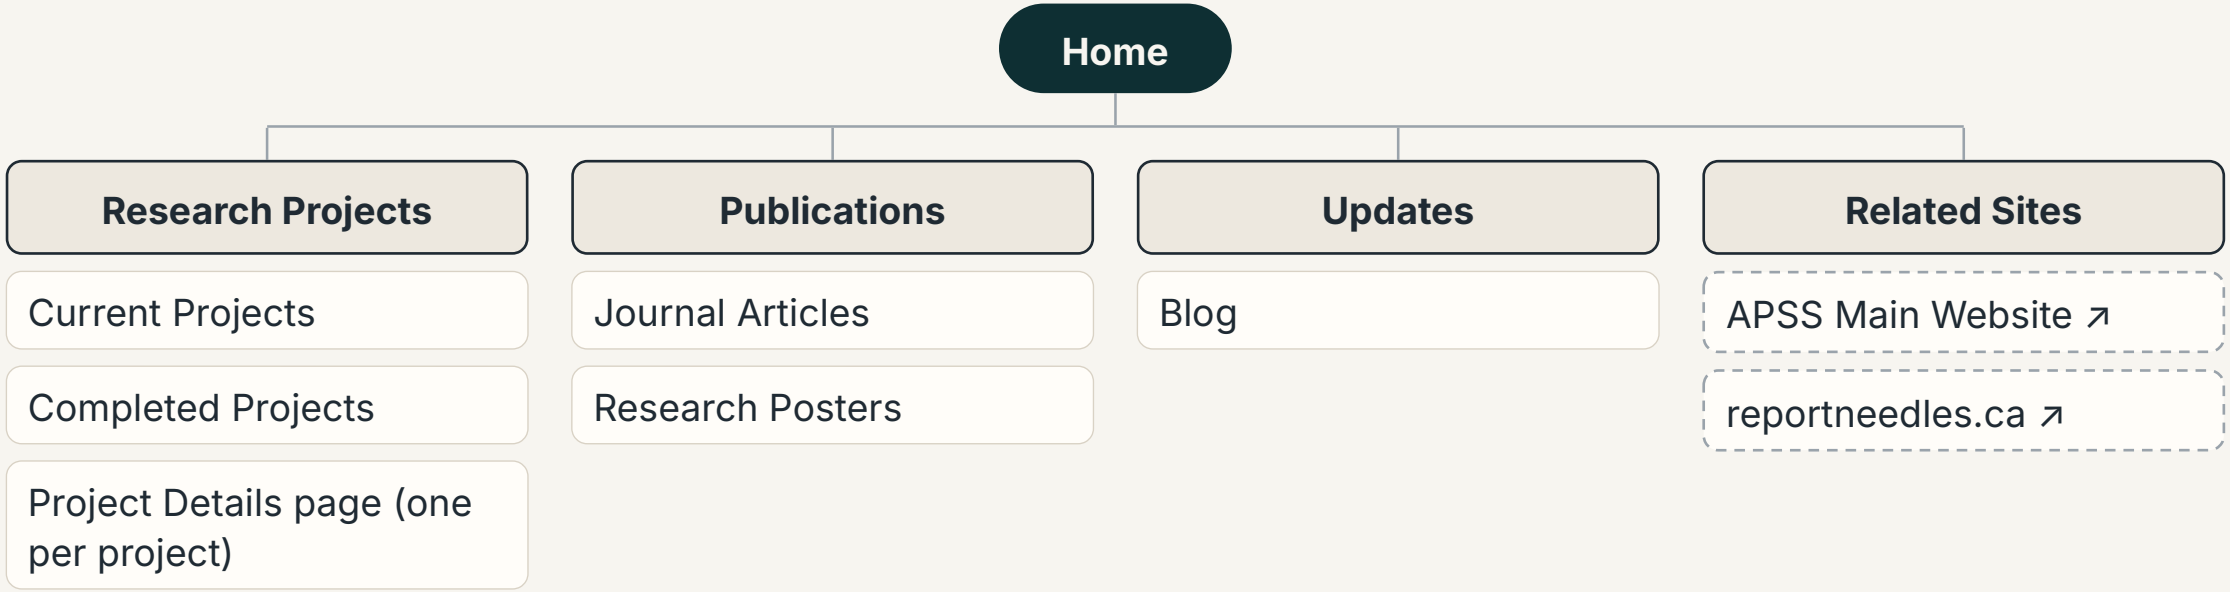

What visitors need, and why

Theme	What visitors need	Why it matters
Research projects	Browse current and completed projects	Shows finished and ongoing work
Research materials	Reach articles and posters quickly	Materials exist but have no home
Research updates	Follow ongoing work through a blog	Keeps partners informed over time
Connected websites	Move easily between all three sites	The sites serve one mission
Website experience	A clear, professional, easy site	Builds trust; must run on WordPress

Did we miss a need your visitors have?

SITE MAP · OPTION A

Option A: a lean structure

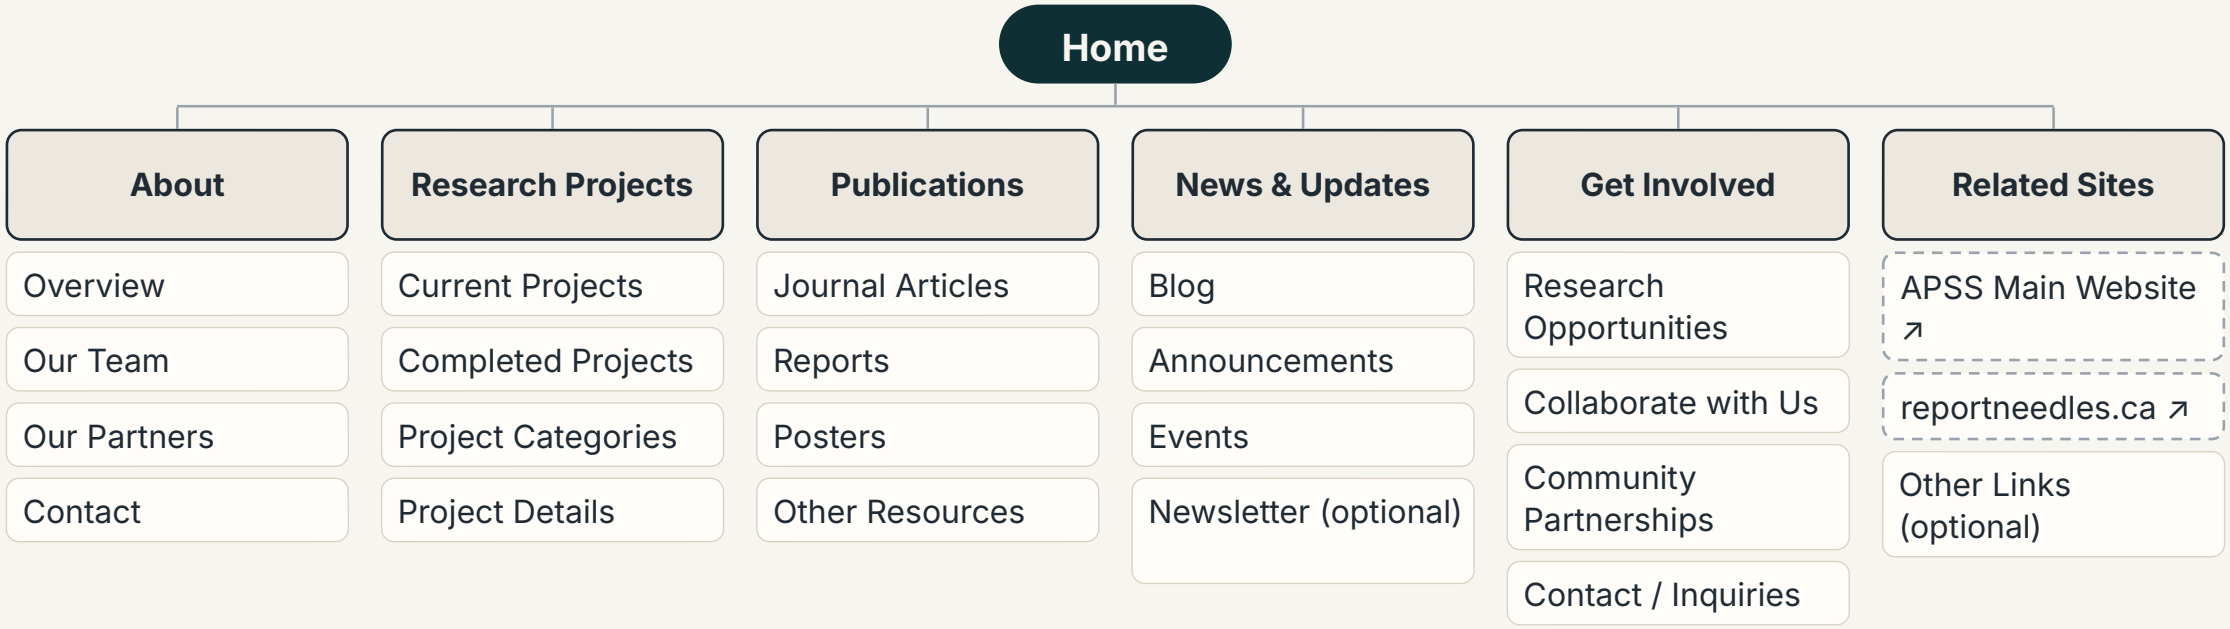

Footer on every page: Contact information · Privacy / Terms · Acknowledgements

Do these labels make sense to your visitors?

SITE MAP · OPTION B

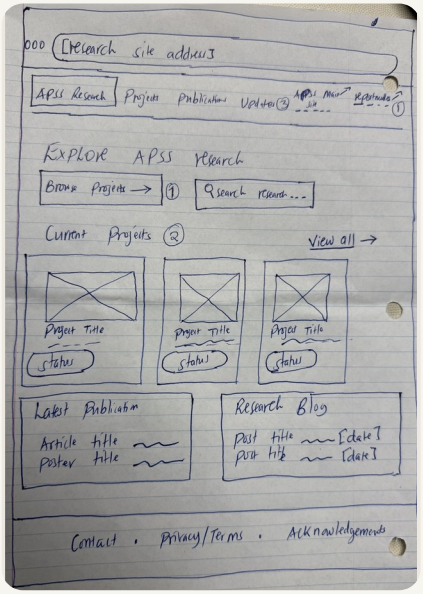

Option B: an expanded structure

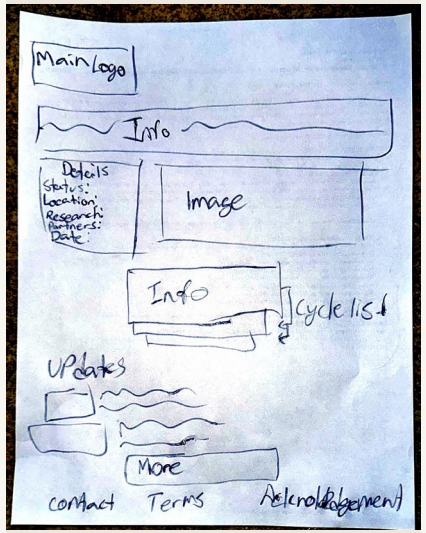

Lean (A) or expanded (B)? Which sections matter most to you?

What works, what doesn't, and what would you change?

DESIGN IDEAS BEHIND THE SKETCHES

People-centred design in our prototypes

01

Affordances & signifiers

Buttons look clickable, and a ↗ marks links that leave for the main APSS site or reportneedles.ca.

02

Gestalt

Project cards share one structure (image, title, status), and related content sits in boxed areas, so groups read together.

03

Constraints

A short main menu keeps the paths clear, and project filters only offer categories that exist.

Also in play: consistency (the same header on every page) and feedback (the current page is highlighted in the menu).

USER STORY MAP

From visitor goals to MVP releases

Activities	**Discover Research**	**Browse Projects**	**Understand Project**	**Access Materials**	**Follow Updates**	**Connect Sites**
Tasks	What is this site?	Current Projects	Overview	Articles	Blog	APSS
	Find research	Completed Projects	Status	Posters	Updates	reportneedles
MVP 1	Home	Current	Project Details	Articles	Blog	APSS link
		Completed		Posters		reportneedles
MVP 2		Filters	Related Projects	Related Resources		

Is MVP 1 the right first release? What must be live by December 2?

BEFORE WE CLOSE

Questions for APSS

1. Who visits the research site most: researchers, funders, community members or media?
2. Who will update the WordPress site after December 2?
3. Are the articles and posters ready in digital form?
4. Are there branding or accessibility guidelines we should follow?
