Usability Results Sheet (team copy)

One sheet per participant. The participant fills in the Quick Test form. You watch, and fill in this one.

How to run it. Hand them the Quick Test form. Read each task aloud. Do not point at the screen or say the menu words. Write down what they click and what they say. If they are stuck for a minute, help them and mark "Help". Collect their form at the end and staple it to this sheet.

Participant: _____ Role: _____ Date: _____ Observer: _____

Part 1: Tasks

Task	Done? (Yes / Help / No)	Ease they circled (1 to 5)	What they did or said
1. Current research			
2. Project partners			
3. Journal article			
4. Newest update			
5. Main APSS website			
6. Report a needle (reportneedles.ca)			
7. Work with APSS (Get Involved)			
8. Phone menu to Publications			

Part 2: Their answers, in their words

Question	Answer
1. What the site is for, and who it is for	
2. Where they got stuck	
3. Unclear menu names	
4. Colours and photos	
5. Too wordy or too scientific	
6. Part of APSS, or separate	
7. One thing to change	

Overall ease they circled: _____

Summary of all participants (fill in after the session)

Task	How many tried	How many done without help	Average ease	Most common problem
1. Current research				
2. Project partners				
3. Journal article				
4. Newest update				
5. Main APSS website				
6. Report a needle				
7. Work with APSS				
8. Phone menu to Publications				

Themes from Part 2. Read all the answers and group them: menu names, colours and photos, too much text, feeling connected to APSS, missing content, phone. Count how many people raised each. Those counts and the table above are the charts for the insights summary.

Type the numbers into usability-results.csv afterwards.
